

Juniper Events is purpose-built for UK schools to directly support Behaviour and Wellbeing, as well as Parent Engagement and Communication.

A joined-up events approach helps schools widen access to clubs, trips and parents' evenings, supporting behaviour, wellbeing and positive experiences beyond the classroom. When events sit within the same parent app as wider school communication, families are more likely to see opportunities, respond on time and stay involved, strengthening parental engagement without adding extra systems or complexity.

Features

Event Management & Invitations

- Create and manage clubs, trips, and parents' evenings in one system
- Send targeted event invites with clear deadlines and capacity limits
- Track responses, consent, and payments

Parent App Bookings & Payments

- Parents have a single app for all school events and activities
- Payments are quick and secure
- Reduce admin by removing paper forms and cash handling

Reporting, Participation & Payments

- View participation levels for every event at a glance
- Understand payment status
- Access detailed reconciliation reports and pupil payment records

Juniper Events makes it easier for schools to organise clubs, trips and parents' evenings by bringing everything into one simple system. From invites and bookings to payments, the full process is handled in the Juniper Education app, which will already be familiar to some families.

Families can view event details, book places and pay securely in just a few steps. For schools, this means less admin, clearer oversight and confidence that records are accurate and up to date.

With built-in reporting on participation and payments, staff can see at a glance how events are filling and where follow-up may be needed. The result is smoother planning, better visibility and events that are easier to manage from start to finish.
